

Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Authentication
FR-2	Farm, Crop, Farmer, Buyer Management
FR-3	Data Entry and Validation
FR-4	Relationship Mapping
FR-5	Report Generation

FR-6	Dashboard Visualization
FR-7	User Role Management
FR-6	Dashboard Visualization
FR-7	User Role Management

Non-Functional Requirements

NFR	Description	Example
Usability	Easy interface	Simple Lightning UI
Security	Data protection	Profiles & roles
Reliability	No data loss	Cloud backup
Performance	Fast access	Reports in <3 sec
Availability	24/7 access	Cloud hosting
Scalability	Handles growth	More farms/users

Solution Requirements

The Farm Management System is designed to provide a centralized, secure and user-friendly platform to manage farms, crops, farmers, buyers and reports using Salesforce.

Functional Requirements

-  FR-1 Allow secure login for different user roles (Farmer, Farm Manager, Buyer, Admin).
-  FR-2 Manage farm details including farm type, soil quality and irrigation type.
-  FR-3 Manage crop details such as planting date, harvest date, yield and acres.
-  FR-4 Register and maintain farmer and buyer information.
-  FR-5 Generate reports and view dashboards for better decision making.
-  FR-6 Provide role-based access control for data security.
-  FR-7 Validate data using Salesforce validation rules.

Non-Functional Requirements

-  **Usability** : Easy to use and navigate for all users with a simple UI.
-  **Security** : Ensure data protection and secure access with role-based permissions.
-  **Reliability** : System should be reliable and work without frequent downtime.
-  **Performance** : Should respond quickly and handle multiple users efficiently.
-  **Availability** : Accessible anytime, anywhere through the cloud.
-  **Scalability** : Able to handle future growth and more data/users.
