

PROJECT DEMONSTRATION

Demonstration

The Farm Management System was demonstrated using Salesforce.

Demonstration of Modules

- Farm
- Crop
- Farmer
- Buyer

Features

- Centralized farm data management
- Record creation and management
- Fields and relationships
- User access and sharing rules
- Reports and dashboards

Advantages

- Reduces manual paperwork
- Improves data management
- Easy access to farm information
- Helps in monitoring and analysis

Disadvantages

- Requires internet access
- Requires basic Salesforce knowledge
- Initial configuration takes time

Reports and Dashboard

Reports

- Displays and analyzes farm-related data
- Helps users monitor records easily

Dashboard

- Provides visual representation of data
- Helps in quick analysis and monitoring
